

Corrigendum/Explanation SFG 2024 Level 1 Test 29

**There is no change in today's paper. Some extra explanations have been provided for the students who have raised doubts.**

**Q.30)** There was an issue raised regarding statement 2 of the Question i.e. "The share of migration from rural to urban areas is highest among males than females."

**Explanation:** Internal migrant flows can be classified on the basis of origin and destination. One kind of classification is: i) rural to rural, ii) rural to urban, iii) urban to rural and iv) urban to urban. As per the 2011 census, there were around 7.8 crores rural to urban migrants. **Women outnumber men in making the rural-to-urban migration.** Of the 7.8 crores, **55% were females** and they outnumbered males in 554 of the 640 districts. Hence, the statement remains incorrect.
