Total/कुल अंक	250		

1. Please do furnish Name, Email, Roll No and Mobile in the answer sheet.

कृपया उत्तर-पुस्तिका में नाम, ईमेल, रोल नंबर और मोबाइल नंबर भरें।

2. There are TWENTY questions printed in ENGLISH & HINDI, all questions are compulsory.

उत्तर पुस्तिका में अंग्रेजी/हिंदी में बीस प्रश्न दिए गए हैं, सभी प्रश्न अनिवार्य हैं।

3. The number of marks carried by a question/part is indicated against it. प्रत्येक प्रश्न/भाग के लिए निर्धारित अंक उसके सामने अंकित किए गए हैं।

4. Answers must be written in the medium authorized in the admission Certificate, which must be stated clearly on the cover of this Question-Cum-Answer (QCA) Booklet in the space provided.

उत्तर प्रवेश पत्र में अधिकृत माध्यम में लिखे जाने चाहिए, जो कि दिए गए स्थान में इस प्रश्न-सह-उत्तर (क्यूसीए) पुस्तिका के कवर पर स्पष्ट रूप से लिखा जाना चाहिए।

5. Word limit in questions, if specified, should be adhered to. Any page or portion of the page left blank in the Question-Cum Answer Booklet must be clearly Struck off.

प्रश्नों में शब्द सीमा, यदि निर्दिष्ट हो, का पालन किया जाए। प्रश्न-सह-उत्तर पुस्तिका में खाली छोड़े गये किसी भी पृष्ठ या पृष्ठ के भाग को स्पष्ट रूप से काट दें।

For Student Only / केवल परीक्षार्थी प्रयोग हेतु

Examiner's Discretion/मूल्यांकन कर्ता का विवेक :	Start Time/प्रारंभ करने का समय : 4:50 am	End Time/समाप्त करने का समय : 7:50 am
Total Marks/कुल अंक :	Mode Of Examination/ परीक्षा की विधि : online	Online/ऑनलाइन <input checked="" type="checkbox"/> Offline/ऑफलाइन <input type="checkbox"/>

*Examiner's Discretion is the marks awarded at the discretion of the examiner based on your overall impression, on the basis of (but not limited to) your handwriting, presentation, use of diagrams, flowcharts, facts and figures or absolutely anything that he/she liked in your copy.

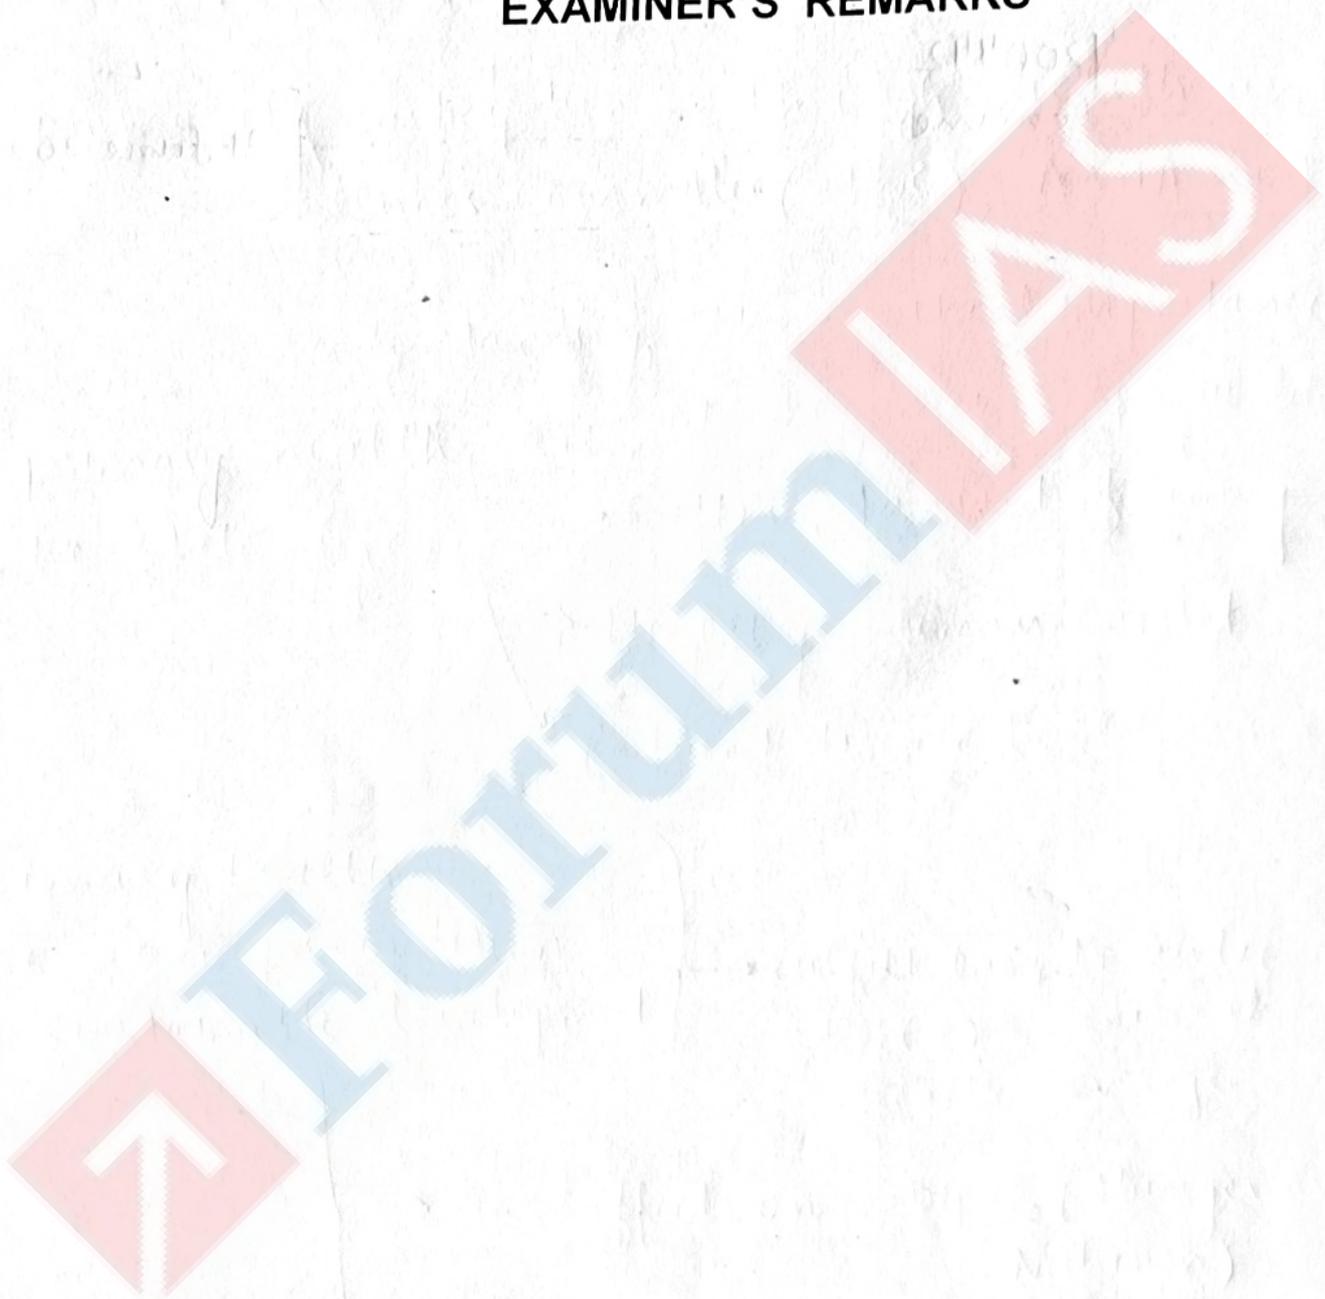

मूल्यांकन कर्ता का विवेक अंक, आपकी लिखावट प्रस्तुति, आरेखों के उपयोग, प्लोचार्ट, तथ्यों और आंकड़ों या समग्र रूप किसी अन्य विषय वस्तु, जो मूल्यांकन कर्ता को आपकी कॉपी में पसंद आयी के आधार पर (लेकिन इन्हीं तक सीमित नहीं) पर दिए गए अंक हैं।

For Office Use Only / केवल कार्यालय प्रयोग हेतु

ECN CODE/ ईसीएन कोड :	EG/ईजी : ① ② ③ ④ ⑤	Evaluation Date/ मूल्यांकन तिथि :
--------------------------	-----------------------	--------------------------------------

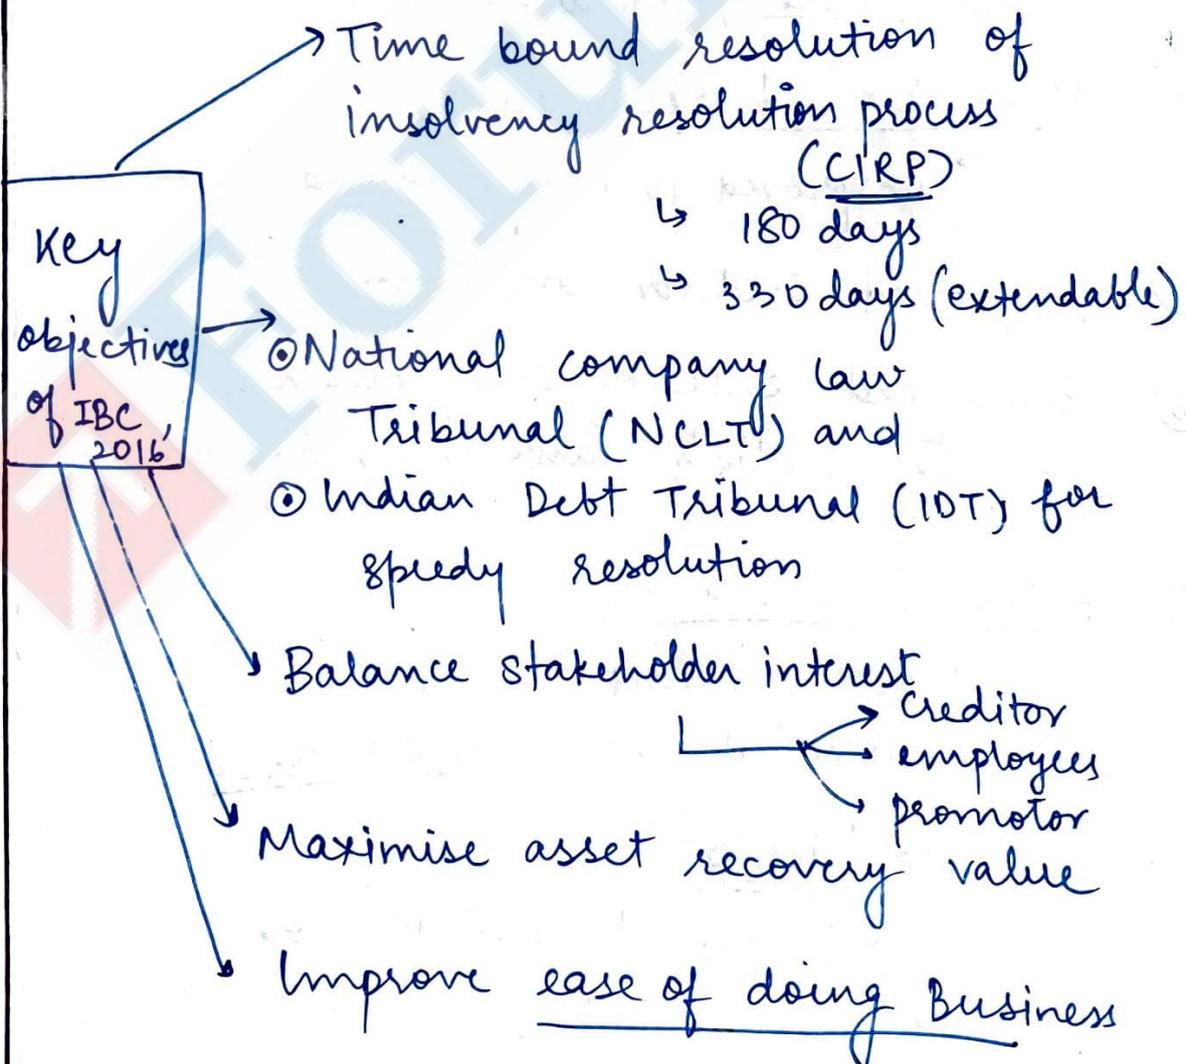

Note: Students are expected to incorporate suggestions from the feedback provided in the answers. Discussions on the tests are also available online in your portal to aid in your preparation. Further, students are requested to share their copies of the tests and learn from them. You can also discuss your copy with a Mentor and discover ways to improve your answers, or if you have any issues with this test / copy. Ask specific questions, to get specific answers.

EXAMINER'S REMARKS

(11)

Insolvency and Bankruptcy Code, 2016 (IBC, 2016) replaced the SARFAESI Act to streamline the insolvency laws and strengthen credit culture.

Achievement of IBC, 2016

① Consolidated Insolvency laws

→ replaced fragmented laws

- SARFAESI Act
- Company Act provisions

② Improved recovery rate
eg (by 31%)

③ Recovery across different sectors

⊗ Steel, micro and small companies

④ Time bound resolution

→ improved to a large extent

⑤ Improved creditor confidence

⑥ Enhanced ease of doing business

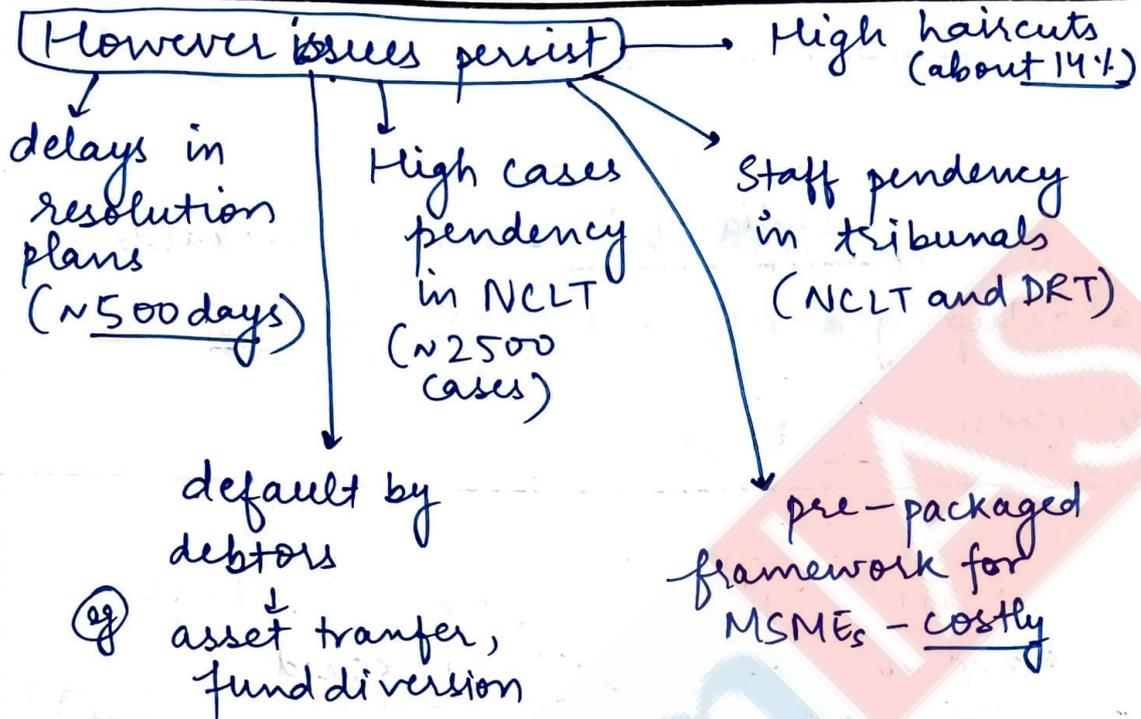

⊗ India's ranking in B-index
(improved)

⑦ Behavioural change

→ better credit culture
→ lowered bank-credit spread

⑧ Changed 'debtor' behaviour

→ improved resolution

Solutions :-

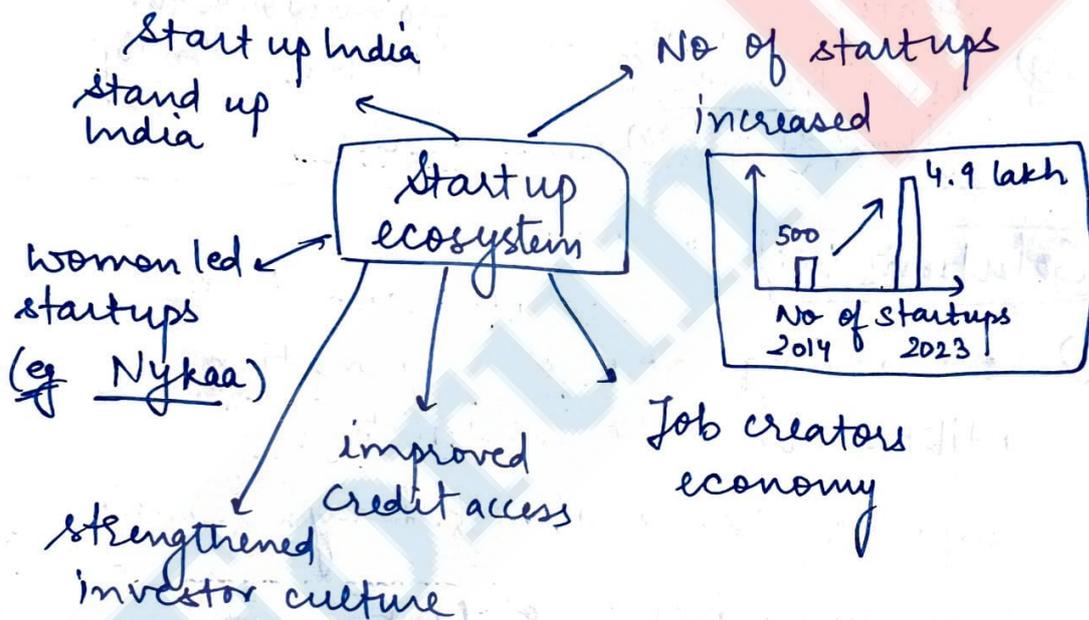

- ① enhancing role of information utilities in debt verification
- ② improve tribunal efficiency
- ③ Capacity building of NCLT
- ④ Better case admission process
- ⑤ Robust pre-packaged insolvency for MSME.

IBC, 2016 did improve credit responsibilities lowering NPA's but refined frameworks will further its capacity towards **credit hygiene**.

U.P.S.C.

12

India witnessed remarkable startup growth with almost 100 unicorns (≥ 1 billion USD)

Startup ecosystem - lagging across sectors

- The startup was largely witnessed in technology sector with 75% focused on Artificial Intelligence

- ② Manufacturing startups
↳ less growth.
- ③ Service sector job creation
↳ swallowed by IT boom
- ④ Laggard diversity
↳ semiconductors
electrolyzers - yet to flourish

Reasons for inadequate focus

- ① Input cost → high
ex) deep-tech startups like semiconductor
↳ investment intensive
↳ import dependency (from China, Taiwan)
- ② Skilled labour
↳ require manpower training for newer emerging fields
- ③ Research and development - lagging
↳ India = only 0.69% of GDP invested
(China ~3% of GDP)

U.P.S.C.

④ Global competition

→ from

- China
- Taiwan
- USA

⑤ Market value chains - uncertain

→ due to

- Trade tariffs
- protectionism

Strategies to bridge the gap

① Legal and institutional support

→ National Semiconductor Mission
→ Small-Modulator reactors push
→ Green Hydrogen Mission

② BHASKAR platform

→ streamline start up process

③ Credit Guarantee scheme

→ to promote deep tech

④ Skilling labour force

→ industry - academia tie ups
→ Internship programs

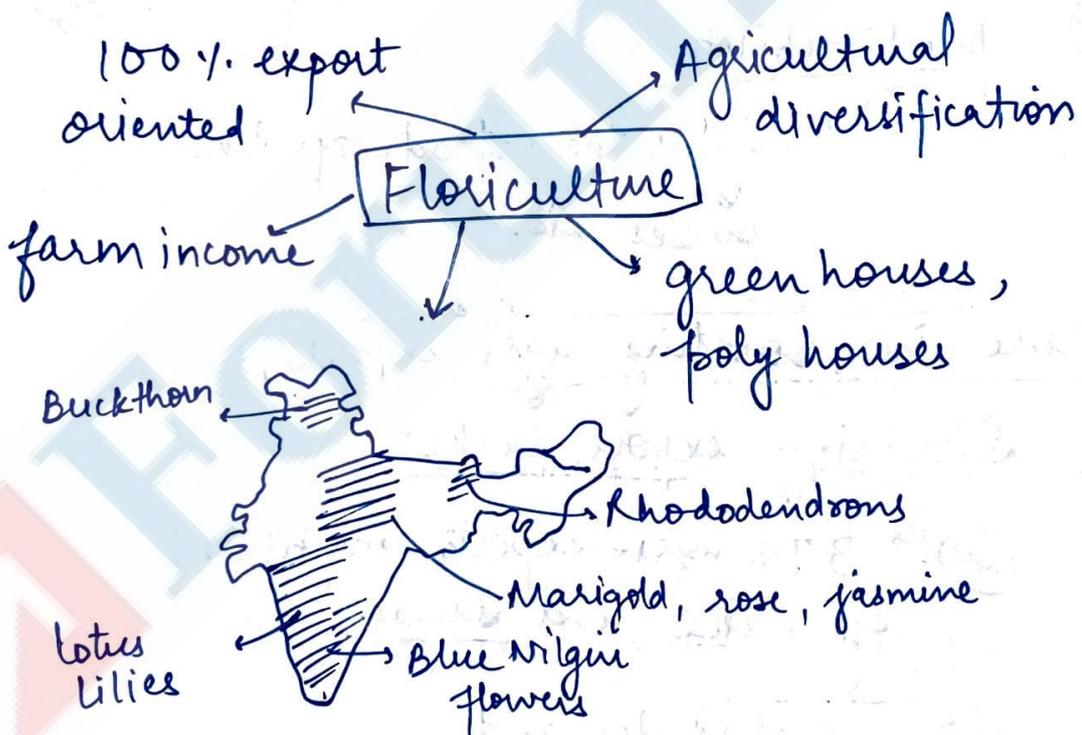

⑤ Startup Mahakumbh

→ bridge stakeholders

The aim of \$7 trillion
economy by 2030 goes through a
deep tech, diverse startup base.

13

Floriculture refers to cultivation and production of flowers. It is a sunrise industry with huge export potential.

Floriculture - enhancing farm income

- ① High yields per unit area
↳ benefits small-marginal farmers (~89%)

U.P.S.C.

② Export growth
→ agriculture only 11-18% of India's
total good exports ↓
help increase

③ Multiple options for revenue
↳ cut flowers
↳ pot plants
↳ dried flowers
↳ in food industry (ex. rose essence)
↳ Gulkand etc.

④ profitability
→ higher than food crops like
pulses etc.

Role in boosting agri exports

① Diversify export basket

① → 37% agri-exports constituted
by rice and sugar

② High global demand

↳ in UK, Netherland,
UAE, Japan, Germany

③ High returns per unit area

U.P.S.C.

However floriculture faces some issues :-

- ① Fragmented landholdings
↳ less scope for diversification
- ② pressure from pest/diseases
②② locust Attack.
- ③ Heatwaves - damage flowers
- ④ High perishability
④④ (Quality drops after 48-72 hrs.)
- ⑤ Cold chain infrastructure
↳ not robust
- ⑥ phyto-sanitary issues (WTO)
↳ in Europe

Way Ahead

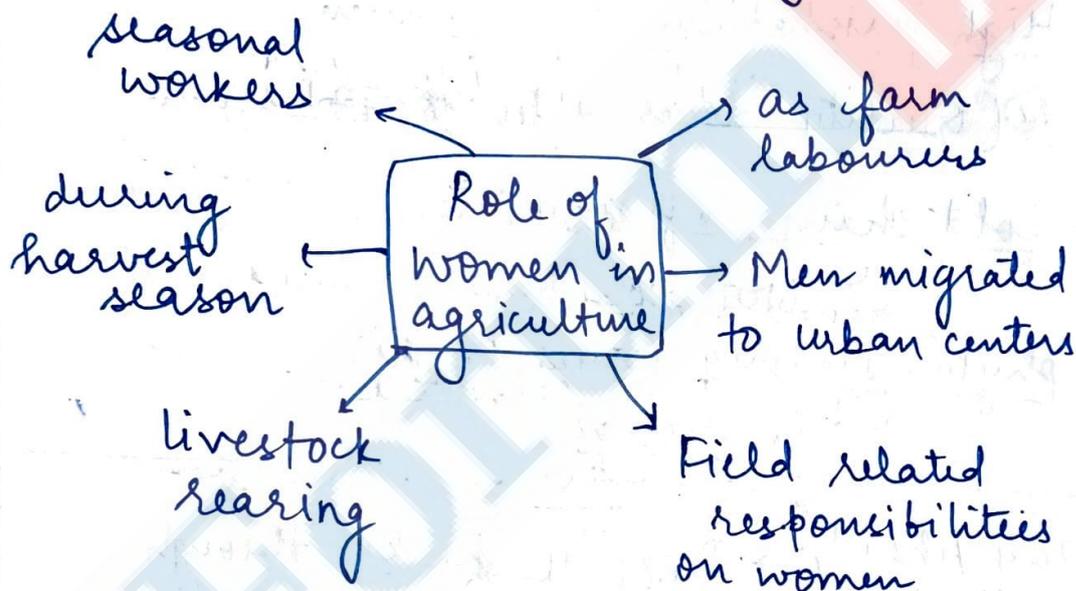

- Quality checks through
- Clean plant program
- Flori-tech parks
- extend aeroponics & hydroponics
- cluster specific GI tags
(ex Nilgiri Rose)
- Cold chain infrastructure investments

The Agricultural Diversification

Fund should be explored to boost farm income.

(14)

About 47% of agricultural workforce is women. This number is significant since out migration of men and "feminisation of agriculture".

Systemic exclusion of women

① land ownership -

- ↳ women own only 13% of agricultural land
- ↳ legal rights under mined under patriarchal norms

↳ often listed as "helpers" rather than farmers

② Access to credit

- ↳ Institutional credit opportunities lagging
 - ↳ because banks require land as collateral
 - ↳ prejudices against women (financial dependency)
- ↳ insurance benefits, subsidy benefits opportunities - missed
- ↳ exclusion from credit leads to
 - ↳ informal credit growth
 - ↳ debt traps
 - ↳ agri-distress

③ Agri-extension services

- ↳ only 15% women farmers exposed to agri-extension services
- ↳ Male dominations
- ↳ Training schedules & times restrict women
 - (Double burden
 - ↳ domestic duties
 - ↳ on field

Initiatives in this regard

- ① Equal inheritance rights under Hindu Succession Act.
- ② ~~the~~ Mahila Kisan Sashaktikaran
Program - women collectives
- ③ Access to credit for women
 - ↳ PM - Jan Dhan Yojana
 - ↳ SHG - Bank linkage - micro-credit access.
 - ↳ Kisan Credit Cards
 - ↳ benefits from PM-KISAN
- ④ women in Agri-extension
 - ↳ promoted through Kisan Vigyan Kendras (KVK)
 - ↳ ICAR's women agri-preneurs
 - ↳ linking SHGs with research institutions.
- ⑤ Start up India initiative
 - ↳ promote women led startups

Changing nature of agriculture with increased role of women must be
shown initiatives to

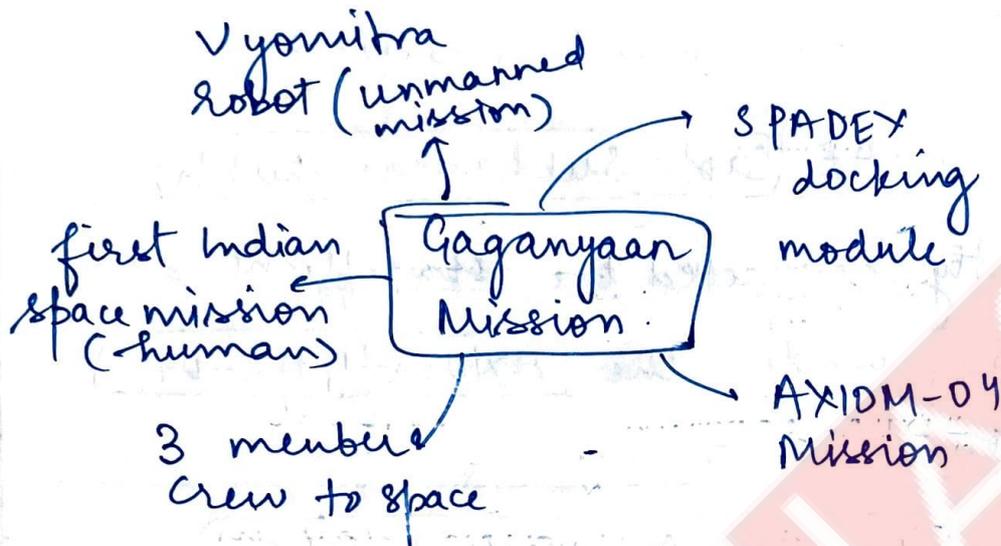

15

IAF Capt. Subhankar Shukla

recently completed the spaceflight
in ISS under the Axiom-4 (Ax-04)
mission.

Key features of Axiom-4 Mission

- ① ISRO - NASA - ESA collaboration mission
- ② to test space flight capabilities of ISRO
- ③ Use of SPADeX Crew dragon spacecraft.
- ④ Strengthen global space collaborations
- ⑤ one of the important component under Gaganyaan Mission
(manned mission to space)

AXIOM-4 role in Gaganyaan Mission -

- ① Real spaceflight experience before Gaganyaan
- ② Conduct scientific research
- ③ Technological experiments in ISS.
- ④ Demonstrate skill and operational readiness
- ⑤ Strengthen Indian global prestige
- ⑥ promote indigenous technology in global space diplomacy

Significance in India's long term
space ambition

"Micro gravity" researches

space economy multiplier

Strengthened Indian role in
"space diplomacy"

inspires STEM talent

promotes Indian image as
"space exporter"

engage in space outreach
programs

Indian space sector
is text book example of Indian
capabilities and exemplifies its
image as Vishva-guru.

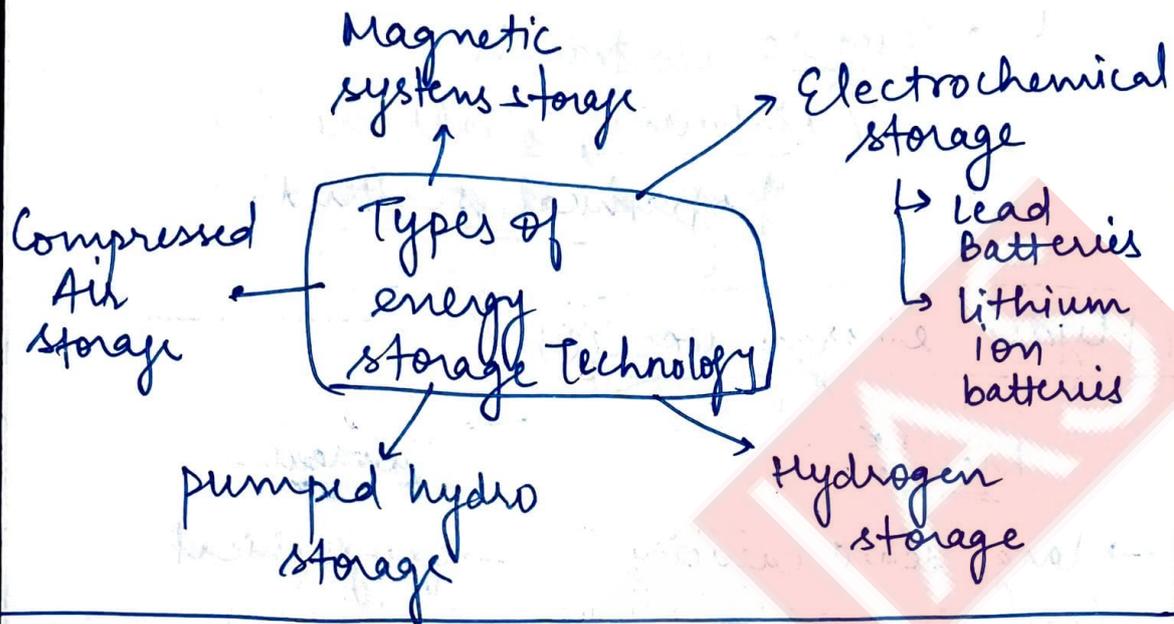

16

IPCC projects that nearly
42% reduction in GHG emission can
help contain the 1.5°C target
under Paris agreement.

Importance of energy storage technology

- ① Helps in supply chain efficiency
in renewables.
- ② Improves grid continuity
- ③ Energy storage relevance increased
in decarbonisation efforts
(Net zero by 2070)
- ④ Integration of renewable energy
to grid - requires storage systems
eg: solar energy → not continuous
→ huge production in
peak hours
→ thus needs storage

U.P.S.C.

Lithium ion Batteries

Merits

- ↳ high energy density
(stores large amount in small volume)
- ↳ high efficiency — 80-90% as compared to lead battery
- ↳ fast response towards grid connection

Demerits

- ↳ High induction cost
- ↳ Degrades over time
(e-waste generation)

U.P.S.C.

↳ Resource Constraints

(Lithium, Cobalt mining
geographical scattered)

Hydro energy storage

Merits

- large scale capacity
(can store more gigawatts)
- long lifespan
- less operational costs
- ubiquitous availability

Demerits

- geographical limitations
(requires elevation)
- high input cost
- ecological effect on marine ecosystem

Green hydrogen storage

Merits

- long duration storage
- Non polluting
- Versatile - used in generation, transport & storage

Demerits

- high costs in infrastructure
- import dependency for electrolyzers (China)

The Green hydrogen Mission of India takes India closer to its

Panchamrita target of net-zero by 2070

(17)

The COVID-19 pandemic and outbreak of SARS COV virus from bat from Wuhan destabilised the global health architecture.

Global pandemic Agreement (2025)

Key features

- initiated by WHO
- countries like India, France, Mexico, Germany onboard.
- focus on global health collectiveness
- sets targets for institutional improvement in health architecture.
- diversified funding mechanism
- focus on non-communicable diseases (eg Diabetes, Cancer)

U.P.S.C.

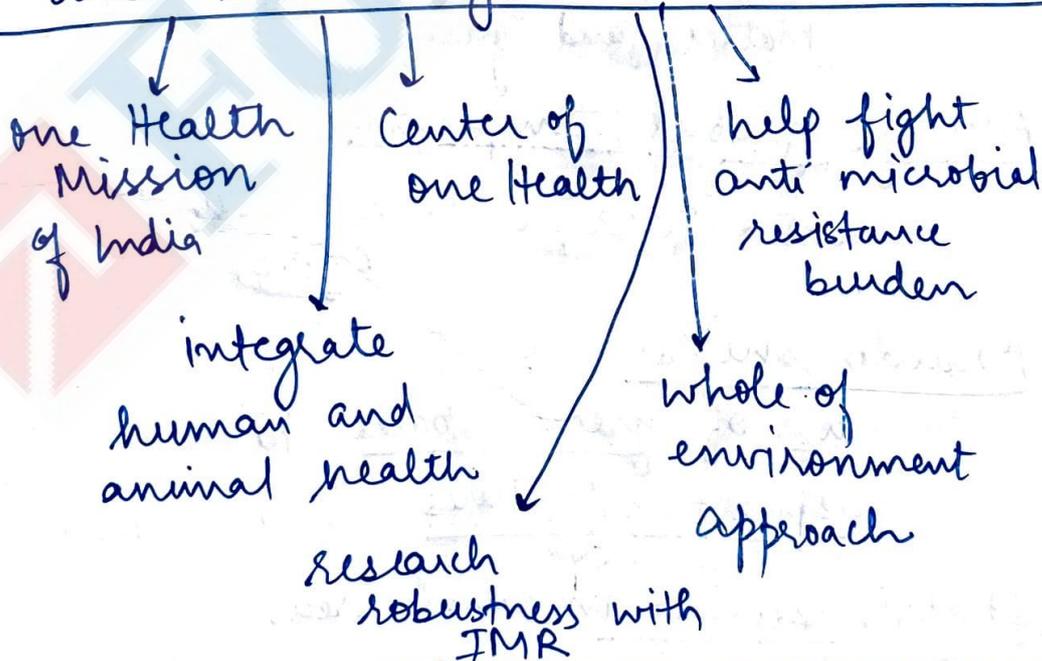

- consensus on expanding the "One health Approach"
- Take measures for preventive healthcare
- rationalise efforts towards disease preparedness and collective global response.

One Health Approach:

- ① Streamlining human and animal health.
- ② Helps prevent zoonotic disease
 - eg Bat → COVID virus
 - Rats → plague
 - Avian → influenza
- ③ One Health approach - helps research on animals in responsible manner for:-
 - ↳ studying disease interconnectness
 - ↳ prepare for any COVID like outbreak

- ④ Helps study viruses better for robust recovery.
- ③ Creates effective and speedy vaccine production
- ② COVID shield, COVAXIN produced with 12-15 months of epidemic
- ⑥ Link animal and human health research infrastructure
- ⑦ Streamline response towards any possible future outbreak.

Steps to integrate in India's environment and health governance:-

In order to fulfill SDG-3

One health approach is step in right direction.

The recent heatwave witnessed in Delhi NCR in July 2025 rings an alarm bell toward the intensity of Urban Heat Islands.

Reasons of Heat waves in urban centres

- ① Rising GHG emissions
 - ↳ vehicular emissions
(NO_x , bad ozone, SO_2 , CO_2)
 - ↳ industrial release of particulate matter and gases.
- ② Average global temperature rise
 - ↳ 0.5-1°C rise since 1750s
(IPCC)
- ③ Albedo shifts
 - ↳ loss of green spaces to asphalt structures
- ④ Stubble burning in rural areas
- ⑤ Cooling systems
 - ↳ release of heat

- ⑥ Urban geography
eg Bowl effect in Delhi

Effects of Heatwaves

- ① on human health
 - ↳ dehydration
 - ↳ heat stroke
 - ↳ Death
- ② peri-urban spaces impacted
 - ↳ agriculture yield declines
- ③ on animals
 - ↳ stray dogs, cows sunburned, dehydrated.
- ④ loss of efficiency and cognitive power
 - ↳ due to excessive heat.
- ⑤ further use of cooling systems
 - ↳ more release of hydrocarbons
 - ↳ more heat
 - ↳ further heat island developed.
 - (positive feedback loop generated.)

U.P.S.C.

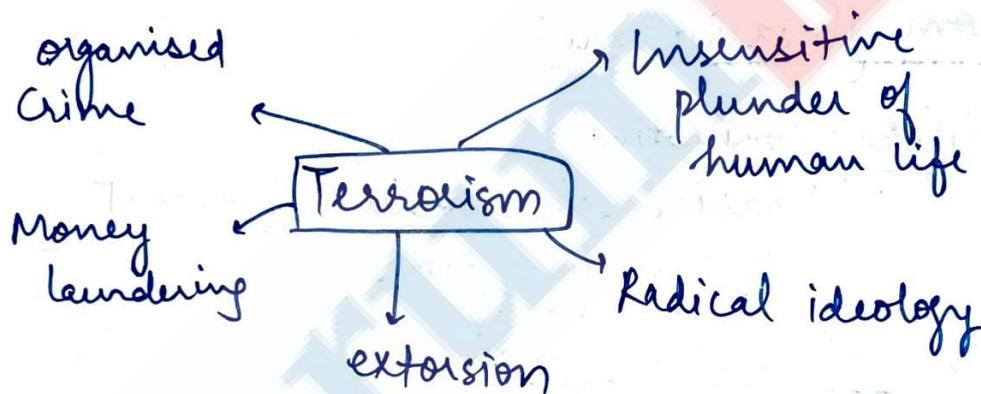

Policies and framework adopted

- ① Colour coded IMD forecasts
 - ⊗ Orange for caution
 - Red for High alert.
- ② Heat Action plan.
- ③ Real time temperature modelling
 - ↳ using AI, IoT
- ④ Robust health infrastructure
 - ↳ Hospitals on alert
 - (ORS, 11 dips)
- ⑤ Heat Resistant Infrastructure
 - ⊗ Green Building code
- ⑥ Land use planning
 - ↳ include
 - ↳ green spaces
 - ↳ Vertical gardens
 - ↳ Road side tree plantations
- ⑦ G. Sheds, water - spaces for stray animals

2023 was forecasted hottest year on record and consistent heat waves since have created havoc. long term focus on NDE targets and Panchamrita

(19)

The June 2025 in famous incident in Pahalgam triggered national and international mediation against terrorism.

Terror financing

From emerging technologies

① Use of crypto currencies

② Monero used by ISIS

② Hawala transactions

↳ white and Black hawala networks used.

U.P.S.C.

- ③ Use of deep web marketplaces
 - ⊗ for arms deal
- ④ online cross border payments
 - ⊗ use of blockchains by LeT
- ⑤ Digital wallets, prepaid cards used for unscrutinised transactions.

From globalisations

- ① Global connectivity
 - ↳ easier cross border movement of money & arms
- ② Use of social media
 - ⊗ Telegram used by ISIS
- ③ Ulicit trade routes
 - ⊗ Taliban uses opium trade for funding terror.
- ④ Propaganda spreading - globally
 - ↳ helps in global crowdfunding
 - ⊗ using Zakat donations through crypto by ISIS.
- ⑤ Illegal money laundering through NGOs, shell companies.

Measures to tackle terror fundingNational

- ① Stringent KYC norms
- ② UAPA act to criminalise terror funding
- ③ Financial intelligence Unit - India to monitor suspicious transactions
- ④ Breakdown the drug-terror nexus (eg Death Triangle) crackdown
- ⑤ NGOs donation regulation (FCRA, 1986)
- ⑥ Technological surveillance (AI, IoT used)
- ⑦ Handle counterfeiting (eg in Kashmir)

International

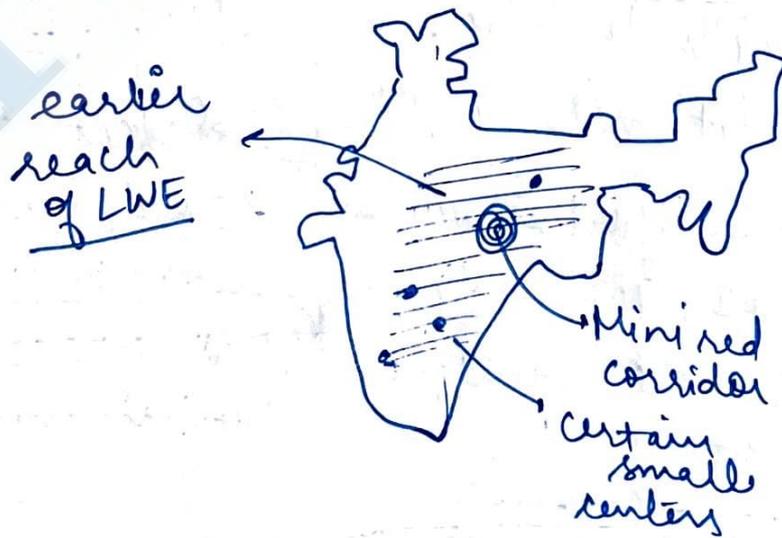

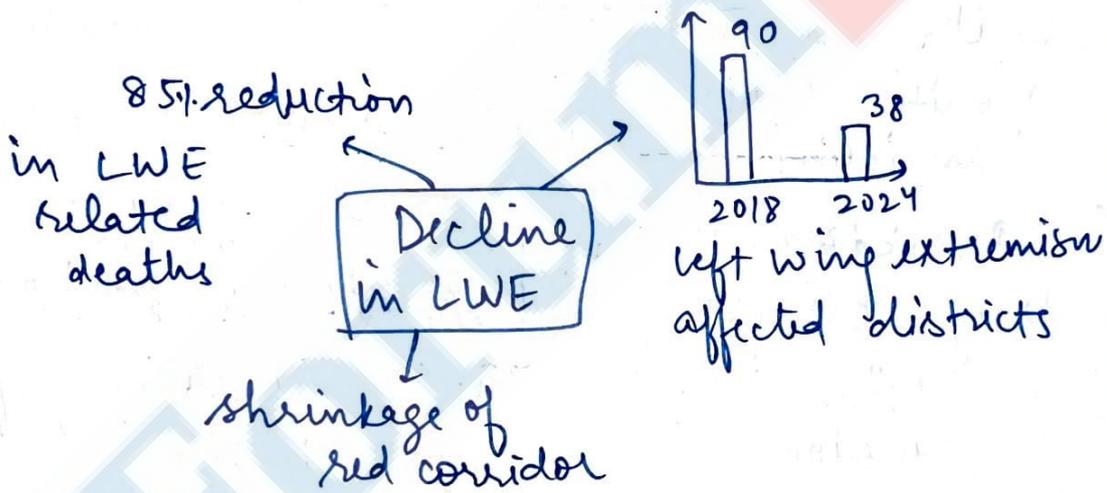

- ① Financial Action Task force efforts (Black listing)
- ② UN council resolution (eg 1267 resolution)
- ③ Interpol's role in tracing sources of ~~it~~ transactions
- ④ Global sharing of intelligence (eg SCO-RATS)
- ⑤ Detect trade based money laundering
- ⑥ Scrutinise tax heaven countries (tax laws)

Terror is a threat to global peace and thus requires global collective action as emphasised by Kofi Annan

U.P.S.C.

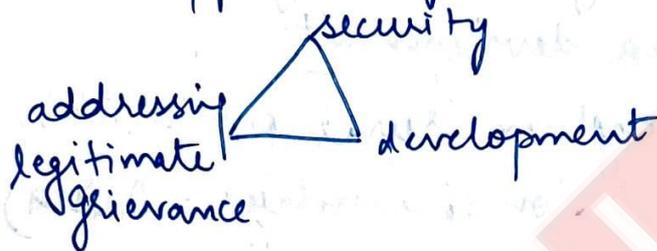

20

There was 81% reduction in left wing extremism related violence hinting towards celebratory success of National policy and Action plan, 2015

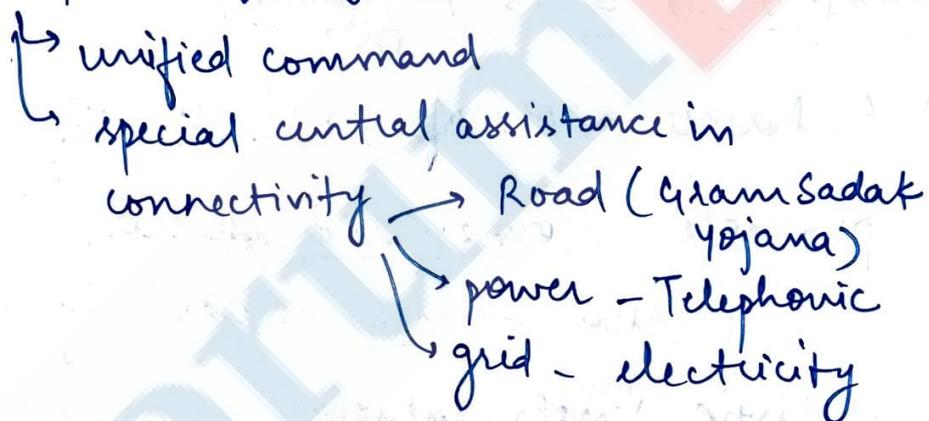

Key components of National Policy and Action plan, 2015 :-

① Broader approach of ensuring security

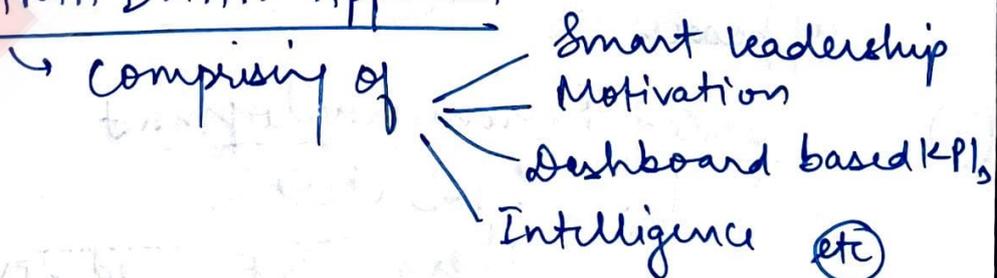

② Development of physical infrastructure

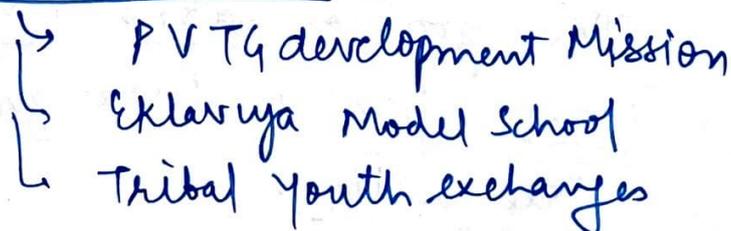

③ Special forces used

(ex) operation Anaconda (Jharkhand)

④ SAMADHAN Approach

⑤ Use of social measures

Question No.
प्रश्न संख्या

U.P.S.C.

- ⑥ Rehabilitation of militants
(ex Surrender cum Rehabilitation policy in Chhattisgarh)
- ⑦ Gram Sabha development
↳ strengthen rural participation
(ex Mission Gramodaya - Odisha)

Additional Steps suggested

- ① Enhance role of civil society
- ② promote women led security
(tribal women in advisory council)
- ③ Holistic implementation of forest right Act (2006) and PESA.
- ④ Strengthen win hearts and minds approach.
- ⑤ Balanced Regional development
↳ job creation
↳ infrastructure led growth

The goal of Sabka Sath,
Sabka Vikas passes through a
moist free India.

(10)

Only 4% of India's critical architecture is "future-ready" against cyber attack.

Cyber space as distinct domain of warfare

- ① Rise of new forms of war tactics
(beyond physical armed war)
- ② Technology boom
↳ uncivilized use. (ex) use by ISIS
- ③ Integration of cyber warfare in conventional war fighting
(ex) claims of Russia intruding USA cyber spaces
- ④ Threatens national security
↳ increased frequency of attacks
(ex) DDoS attacks on Mumbai (2025)
↳ target critical infrastructure
ex • 2022 - AIIMS attack
• Cyber threats on Kudumkulam

Question No.
प्रश्न संख्या

U.P.S.C.

- ↳ face less, border less kind of warfare
- ↳ high returns on input cost
(~~is~~ exposes critical vulnerability)

Counter-measures

① Legal Measures

- ↳ National Cyber Security policy, 2013

- ↳ IT Act, 2008

- ↳ National Cyber Security ~~policy~~ strategy, 2020

② Institutional mechanism

- ↳ National Cyber Security Coordination

- ↳ Cert-In

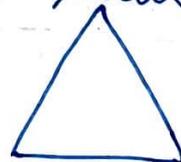

- ↳ Cyber Swachhata Kendra
(M - Karach)

③ Kerala cyber security Center

④ Cyber dome project

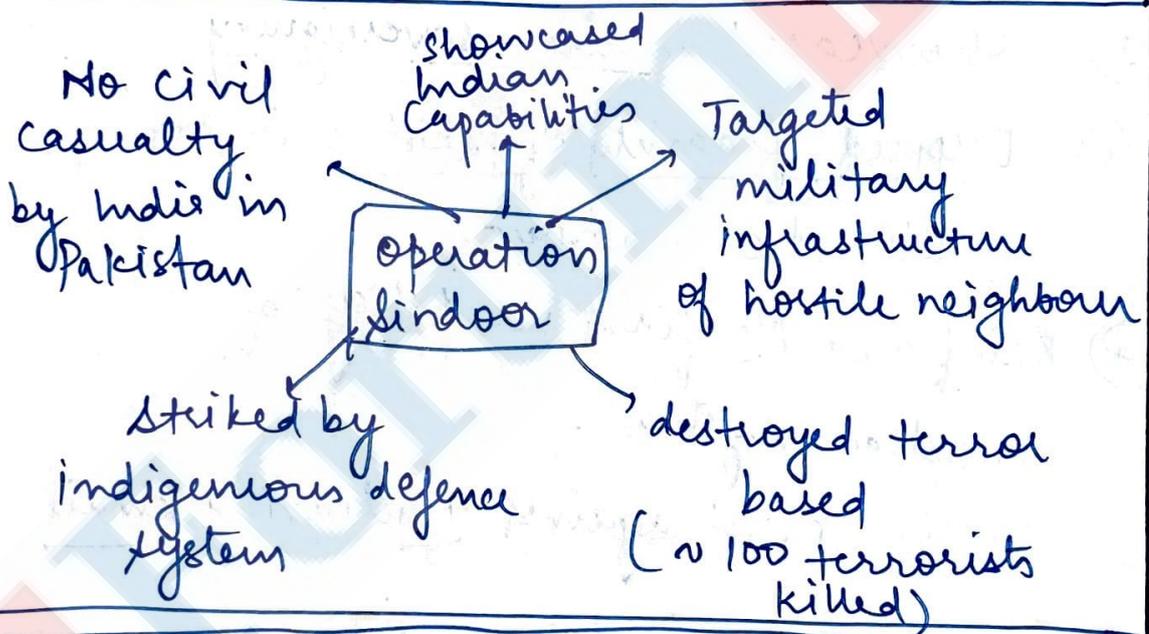

⑤ Cyber warrior police force.

Cyber security must be tackled by 3S approach of secure

9

The Pahalgam attack and its indecent nature was retaliated by utmost decency by India in form of Operation Sindoor.

Operation Sindoor signalling evolution

- ① Strategic restraint to response.
↳ India followed aggressive diplomacy.
- ② Acted as a vocal, loud response against state sponsored terrorism

Question No.
प्रश्न संख्या

U.P.S.C.

- ③ The Indus Water Treaty - temporarily suspended
(first time since 1960)
- ④ India raised a strong global voice
↳ got international support
(from EU, USA, Russia, Australia)
- ⑤ Showcased Indian sovereignty
- ⑥ Exposed fragility of Pakistan in a
systematic manner.
- ⑦ Reinforced No first use policy of
nuclear systems.
- ⑧ India voiced against Nuclear Blackmail
- ⑨ India asserted future retaliation
in case of future daring of Pakistan

operation Sindoor was much more than defense and attack. It was a strong India voice telling the rogue state that "blood and water will not flow together".

8

In rising cases of disasters and extreme weather events required newer approach for disaster management

Key provisions for Disaster Management Act 2025 :-

- ① planning by state and national disaster response force (
 - ↳ NDRF
 - ↳ SDRF
- ② Bottom up approach of planning, execution and response of disaster
- ③ Creation of Urban Disaster Management fund (UDMF)
- ④ Focus on urban and newer forms of disasters.

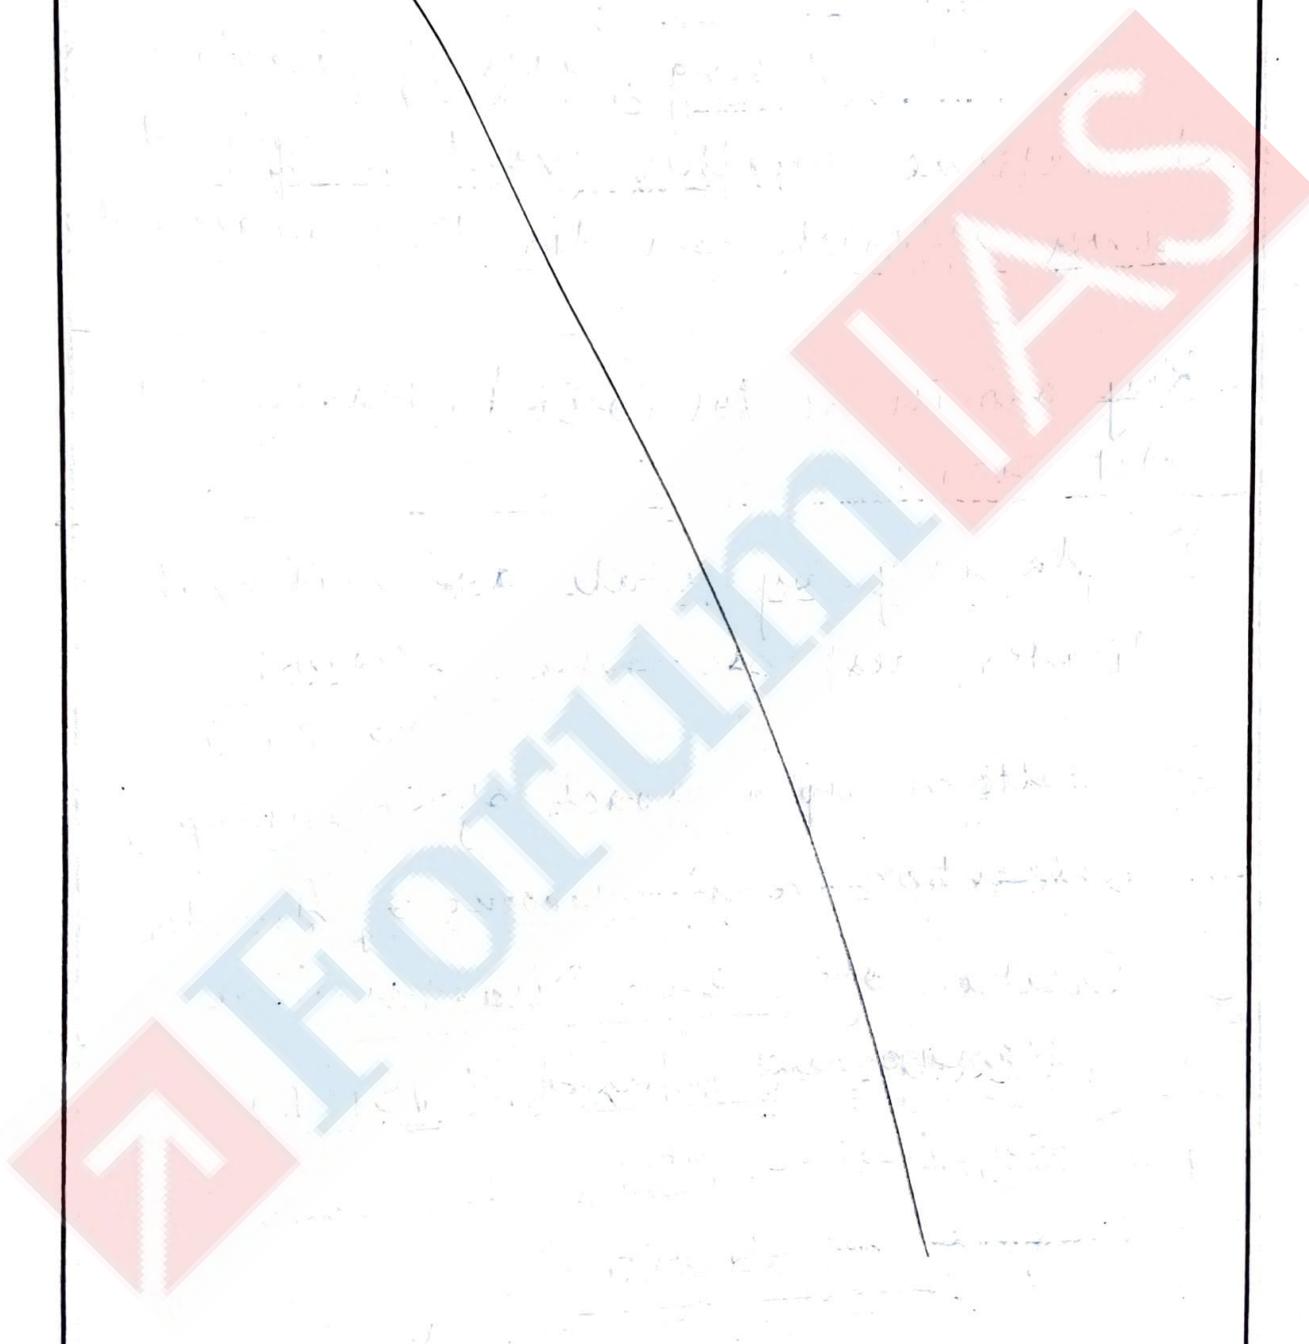

398954_813415_1910188064_(2025-08-12 06:43:46)

Question No.
प्रश्न संख्या

U.P.S.C.

for practice
use only
सिर्फ अभ्यास
के लिए

[Faint handwritten text, mostly illegible due to bleed-through and watermark.]

U.P.S.C.

①

The periodic labour force survey (PLFS) was changed in accordance to adjustment to labour market changes.

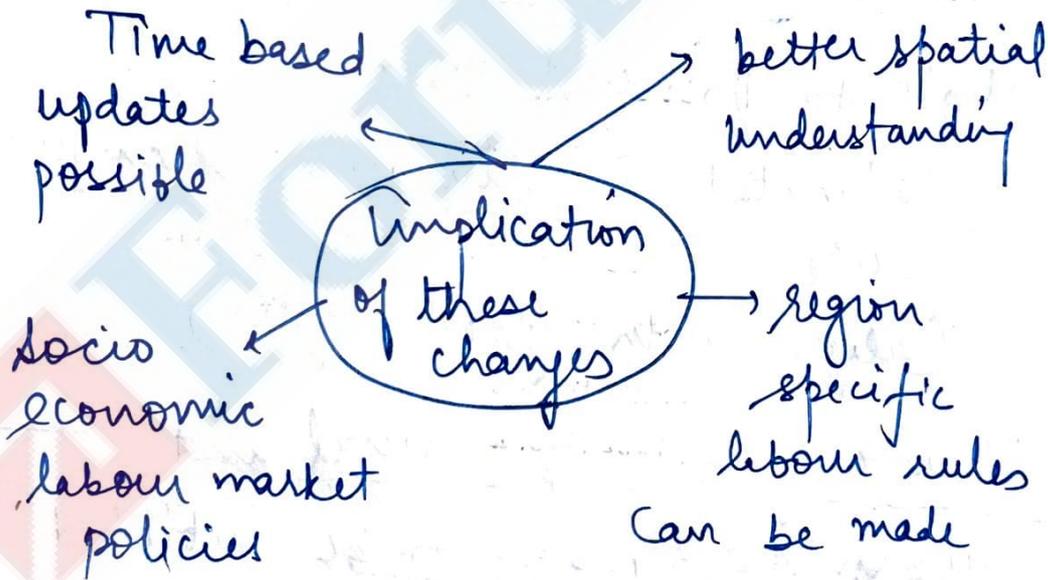

Changes made to PLFS

- ① Adjustment in calendar year
↳ Data to be represented & estimated in January to December cycle
(align with global system)
- ② Quarterly data for rural and urban areas both to be published
- ③ Availability of monthly estimates of key labour markets.
- ④ Enhanced sample size (2.6 times increase) for big picture.

U.P.S.C.

- 5) Improved geographical representation
↳ now "district" as unit
- 6) Improvement in social indicators data availability.
 - ↳ education
 - ↳ Land Records
 - ↳ Household income

covered
- 7) Timely updates on labour market

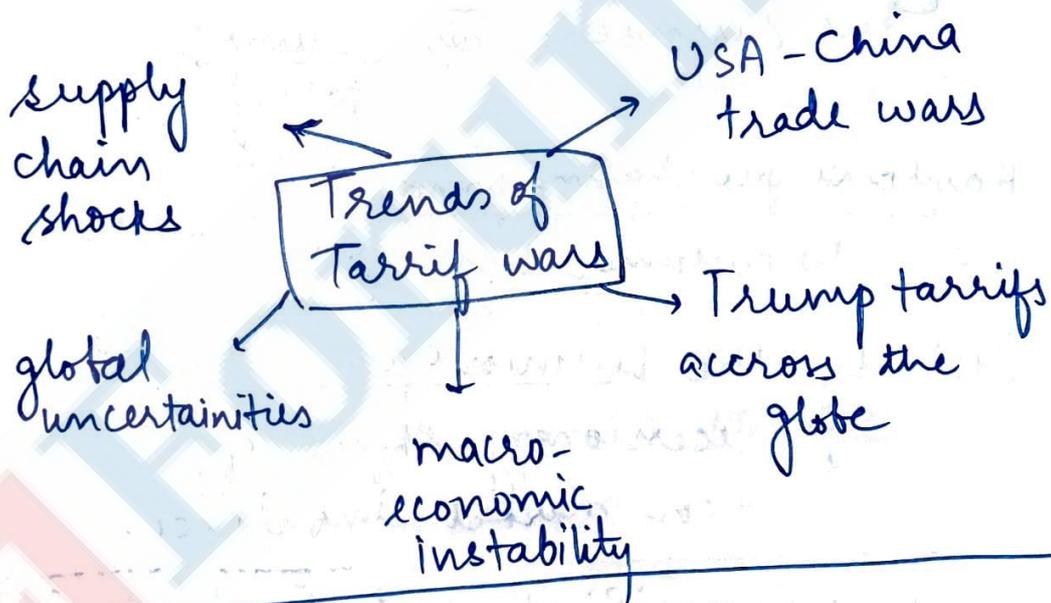

with changing times,
such labour markets updates helps
in making India driver of global growth

U.P.S.C.

②

The rising trade wars
and recent tarrif slapping of 50%
by the Trump administration hints
towards global uncertainties.

Implications of Trade wars

- ① Hampers exports
→ export markets hits with higher custom duties
- ② India's agricultural, textile, gemstones etc — sectors at receiving end.

Question No.
प्रश्न संख्या

U.P.S.C.

- ③ Balance of payment crisis
 ↳ because of decreasing exports
 ↳ and rising import costs
- ④ Inflationary effects
 ↳ unsustainable tariffs of upto 50%
 lead to inflation.
- ⑤ Reciprocal tariff regimes
 ↳ in response to (iv) Trump tariff.
- ⑥ Hampers purchasing power
 ↳ customer loss
- ⑦ Disturbs the business cycle
 ↳ recessionary effects of
 such market imbalance.

Way
Ahead

- ↳ Diversification of supply chain
- ↳ Tap newer markets (eg Africa)
- ↳ FTA with mini lateral organisation (eg BIMSTEC)

The world is slowly drifting
 towards deglobalisation thus signifying
 importance of Atmanirbharta.

2

India grappled with hidden hungers and diminishing agri-productivity is exploring genome edited crops -

Genome-edited crops for food security

- ① Use of CRISPR-Cas9, Talens methods for seed production
 - ⊗ climate resilient seeds
- ② Help increase crop productivity
 - ↳ yield increase by 20-50%
 - ⊗ HYV seeds
- ③ Disease resistance
 - ↳ ⊗ Bt Cotton - against bollworms
- ④ Application against stubble burning
 - ↳ to develop short duration crop
 - ∴ ↳ help improve soil health
 - ↓
 - increase yield

U.P.S.C.

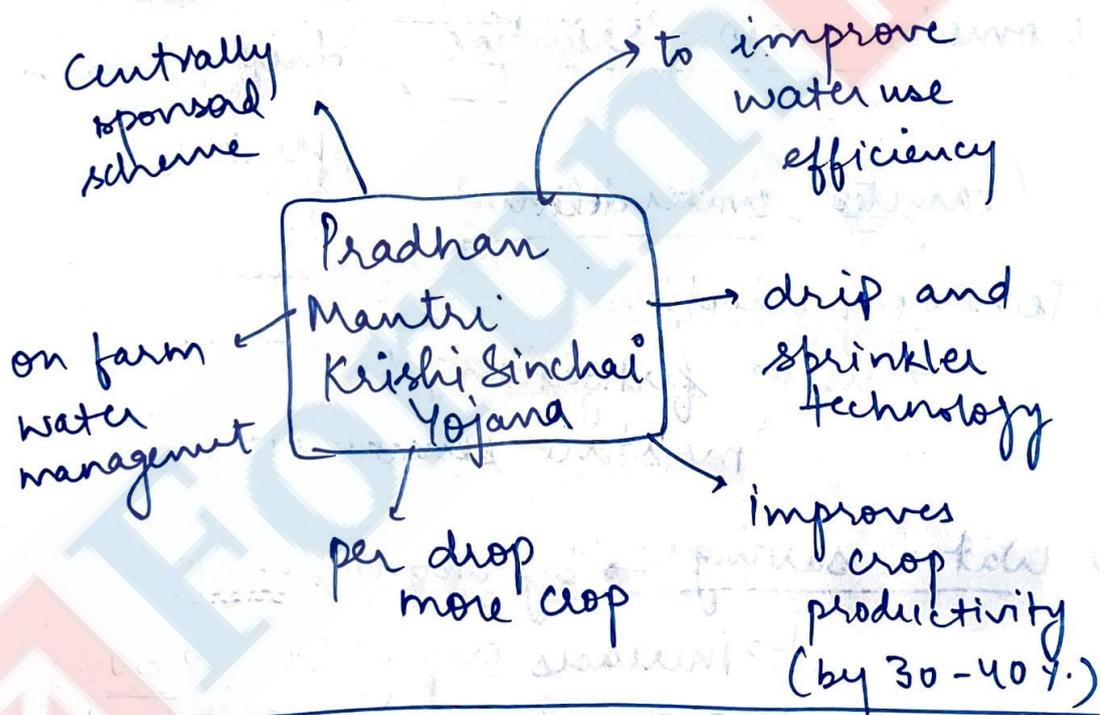

Potential in nutritional security

- ① through seed fortification
 - ↳ ex) VITA infused rice
- ② pest resistance → no use of pesticides or fertiliser.
 ↓
 human health improve
- ③ Bio fortification of crops
 - ↳ ex) → Golden Rice
 - ↳ Iron, Zinc rich millets
 - ↳ improved amino acid profile.
- ④ Reduce risks of undesirable traits in crops.
 - ↳ ex) reduces anti-nutrients
- ⑤ Can be used to lower allergic compounds in crops

with clear science based regulations and public awareness, the genome edited crops can act as a responsible agricultural innovation.

4

The micro-irrigation practice has a potential to improve farm income by 50%. (Dalwai panel)

Role of PMKSY in expanding irrigation coverage

- ① Area development Approach
↳ expand irrigation coverage by completing stalled projects
- ② Promoting new irrigation sources

Question No.
प्रश्न संख्या

U.P.S.C.

↳ check dams, tube wells etc.

③ Command Area Development

↳ ensure water reaches farm gates

④ 23 lakh hectare covered under micro-irrigation.

Role in improving water use efficiency

① promote micro-irrigation

drip

sprinkler

(targeted water delivery)

② Technology adoption

↳ using fertigation, moisture sensors

③ Water saving → by about 20-40%

↳ increases crop yield (~30%)

Challenges

- ↳ high input cost
- ↳ farm adoption less
- ↳ silos based coordination

Way Ahead

- ↳ Custom Hiring centers used
- ↳ farm awareness
- ↳ Micro irrigation fund

Micro irrigation must be adopted in all forms of agriculture as recommended by Salwai Committee.

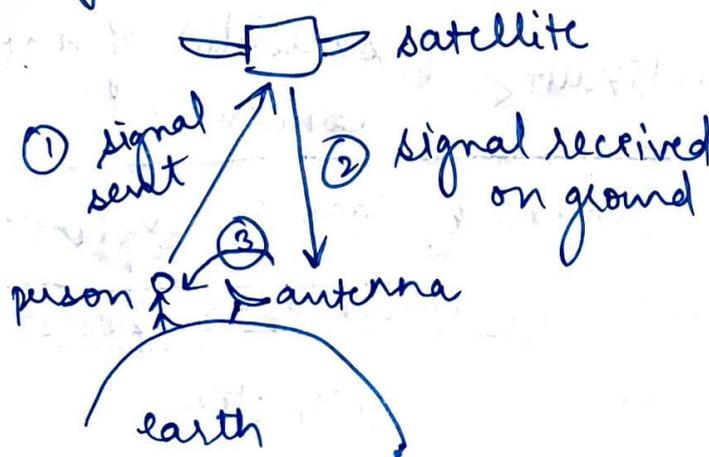

5

Recently Elon Musk's
Starlink project has expanded
its wings into Indian markets.

Satellite Internet

↳ access to internet services
through satellite based
communications. It is different
from conventional internet,
which is received from land
based optic cables.

Working of Satellite Internet

U.P.S.C.

- The person sends message from ground.
- The signal is sent to satellite in space.
- The satellite sends signal back to on ground antenna.
- The person's router receives it.

Starlink - satellite internet

Advantages

- internet services without regional disparities
- one time investment
- can be used in geographically remote locations
- internet continuity

Disadvantages

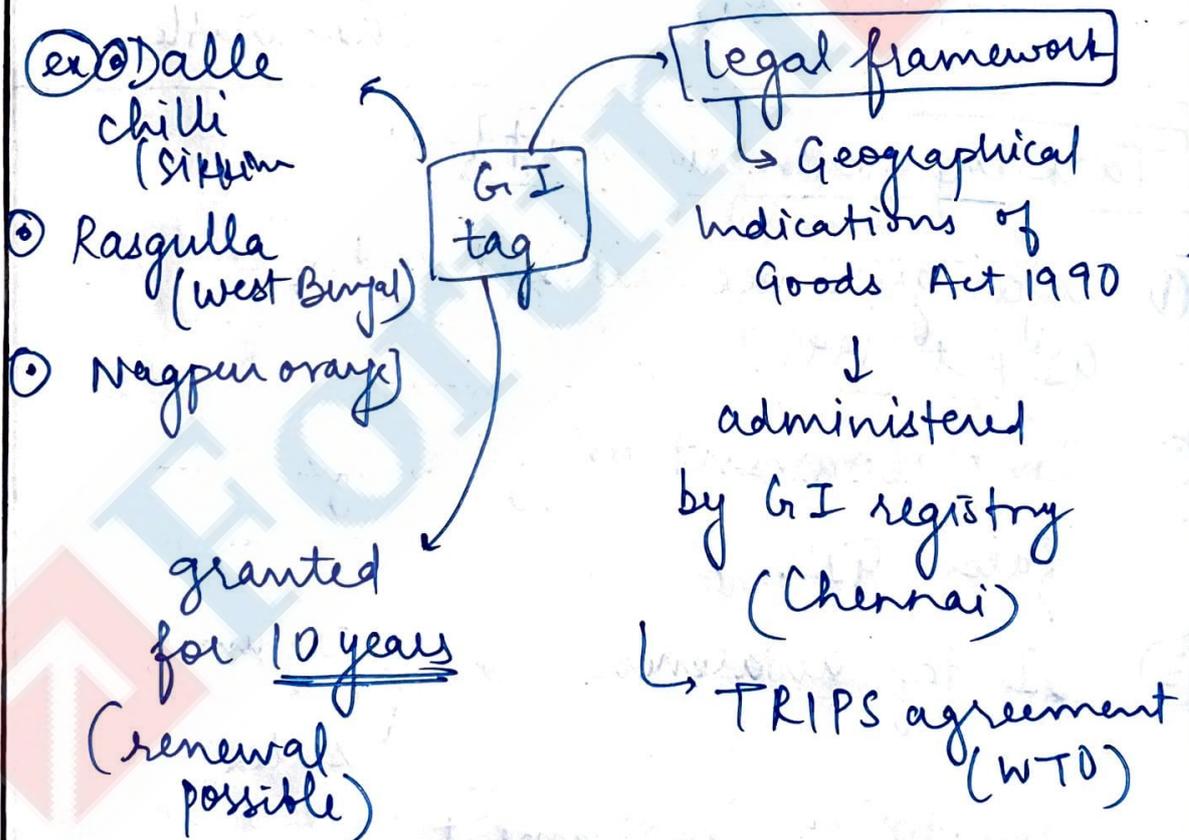

- high input & operational cost
- latency issue
- unsuitable for emergency services or video calls
- privacy and security of data concerns

Starlink can be explored in India but personal data protection mechanisms must be respected.

U.P.S.C.

(6)

Geographical Indication (GI) is the sign used on product that has a specific geographic origin, qualities and characteristics.

Trademark

↳ identifies good/services as originating from particular company or individual.

U.P.S.C.

GI

- Goods only
- Geographical / location linkage
- cannot be transferred
- 10 years (Renewable)

Trademark

- Goods or services
- company / individual origin
- can be traded or sold
- also 10 years (Renewable)

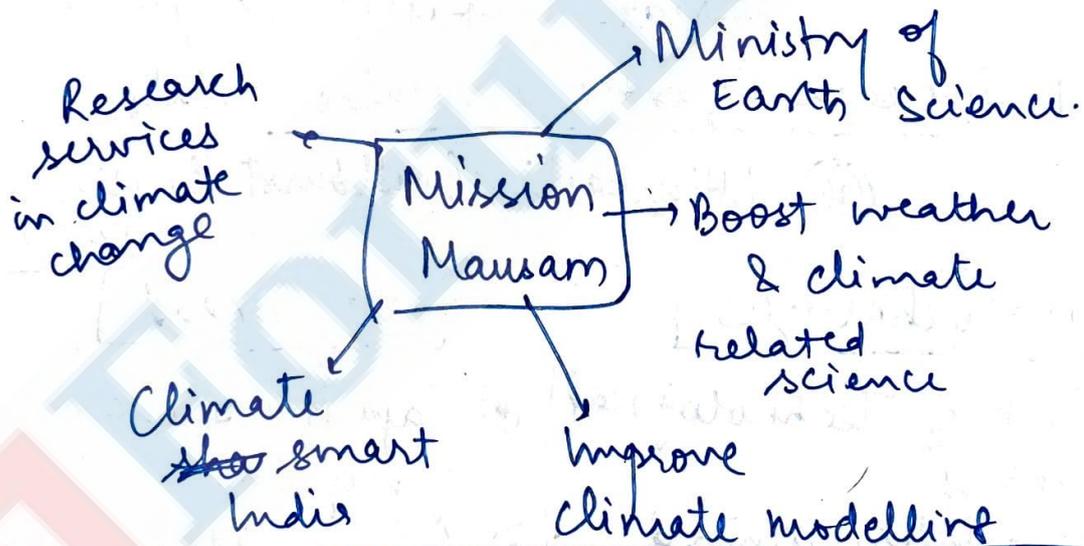

Tackling GI infringement

- ① legal grievance redressal under GI Act, 1999
- ② Imprisonment or fines for false GI.
- ③ GI tag awareness for consumer / seller
- ④ Monitoring infringements

GI tags protects cultural, rural heritage thus legal vigilance along with consumer awareness

(7)

The IPCC warned the world towards a transition to Global boiling from global warming.
The project Mausam finds relevance in this context.

Need of Mission Mausam

- ① Global warming - rising
↳ 1.5°C containment of Paris agreement seems unachievable with current pace (-IPCC)

U.P.S.C.

- ② Need of adaptation
↳ climate ready citizens
- ③ Agriculture at receding end
↳ affect on productivity
- ④ Land Use land Cover - changes
↳ soil moisture loss
↳ land degradation
- ⑤ Sea level rise
↳ Threatens coastal ecosystem
- ⑥ Rising cases of extreme weather events
↳ Uttarakashi cloudburst (2023, 2025)

Likely challenges

- ① Lack of Technological access
- ② Capability limited
- ③ funding constraints
- ④ Adaptation issues

Way Ahead

- ① Capacity building of people
- ② Green, Blue bonds
- ③ Global technological cooperation

The fifth Panchpram for Green growth and fulfilling Panchamrita required Mission Mausam.
