EXAMINER'S REMARKS

CRITERIA FOR THE FEEDBACK SECTION AT THE END OF EACH QUESTION

1. **AWIS = Answered What is Asked.** This means whether you have addressed the core demand of the question or not. Addressing the core demand of the question gets you an objectively fair score. It is examiner's perception if you have understood the question and if you know the answer in the first place. Creative answer writing, sometimes missing the core demand, may fetch very high or very low scores, and exposes your answer to the subjectivity of the examiner.
2. **CD & VA = Content Density & Value Addition.** Examiner will evaluate the quality and quantity of your content in the answer. In the same word limit and space limit have you (a) written what is asked (b) gone beyond what is asked (c) enriched answers through combination of (but not all!) suggestions, ideas, quotes, flowcharts, diagrams, facts and figures, data etc. This affects objective components of assessment.
3. **S & F = Structure & Flow =** Whether you have structured your answer properly or not. Whether the answer has been broken into parts and sub-parts and each part has been addressed appropriately or not. Whether the flow of the answer is maintained. Affects both subjective and objective components of assessment.
4. **P & R =** How your answer performs on the criteria of presentation, ease of read, clarity and apparent effort in writing the answer. This affects the subjective components of assessment.

हिंद महासागर अत्यधिक तीव्रता से गर्म हो रहा है। इसका भारत की खाद्य सुरक्षा पर क्या प्रभाव हो सकता है? (15 अंक, 250 शब्द)

According to FAO, world could see reduction in agricultural and fisheries productivity by 30% by 2050 if climate change continued at this pace.

Affect on Food security of India:

- ① fisheries / Aqua production: reduced by 20% with 2°C increase. (FAO)
- ② India 2nd largest fisheries producer.
- ③ Effect on Monsoon: this can hamper

food grains production, disrupting monsoon cycle when 50% of agriculture is rain-fed.

- (4) Increasing Drought spans: High pressure belts over Indian ocean leads to EL-NINO situation \rightarrow reduced rainfall.
- (5) Heatwaves frequency: (1900-2000) saw 27% increase in heatwaves frequency (WMO) \rightarrow crop failure.
- (6) Pest Attacks: like locust attack due to increased temperature and humidity.
- (7) Post-harvest losses: due to increased temperature perishability will decrease. (already 20% losses) \rightarrow NITI Aayog.
- (8) Increased cyclones (9) Amphan in Gujarat (37% increase of cyclones in Arabian sea in last 25 years) (IMO) \Rightarrow destruction of crops and livelihood.

Thus, we need to mitigate these effects and adapt to make our agriculture climate resilient.

- ① Mitigating climate change through Green Technologies, EV, etc.
- ② Behavioral change: LIFE Mouv.
- ③ Climate resilient seeds for food crops like HYV seeds
- ④ Diversification of food basket
(eg. inclusion of Millets).
- ⑤ Acqua-culture through Hydroponics, aquaponics, etc.
- ⑥ International collaboration for technology and finance transfer
(eg. GEF of UNFCCC)

India still has 23 crore multi-dimensionally poor people and 15% of mal-nutrition, over and above this food insecurity is last thing India wants.

Q.17) Describing the distribution of sugarcane producing countries, examine the major environmental challenges associated with its cultivation. (15 marks, 250 words)

गन्ना उत्पादक देशों के वितरण का वर्णन करते हुए, इसकी कृषि से जुड़ी प्रमुख पर्यावरणीय चुनौतियों का परीक्षण कीजिए। (15 अंक, 250 शब्द)

Sugarcane is a cash crop for adding sugar to our food basket. India is a 2nd largest producer of sugar and largest consumer.

Distribution of Sugarcane production.

Major environmental challenges:

- ① Water intensive crop: 1 tonne of sugarcane require 7000 liters of water.
- ② Nutrient exhaustive crop: in north belt of Uttar Pradesh soil quality is degrading.
- ③ Stubble burning: leading to air pollution.
- ④ Excessive fertilizer and pesticide usage: leading to water pollution both under-ground and river water.
- ⑤ Food insecurity: due to monocropping of commercial crops.
- ⑥ Threat to crop diversity: due to excessive sugarcane production = loss of other variety of crops like Rice = Bodo, etc.
- ⑦ Air and water polluting sugar mills: they are established near water bodies.

→ harming aquatic ecology & habitat.
 (eg) Along Ganga in Bijnor region.

Measures to check environmental harm:

- ① Importing cheaper sugar (Santakumar Panel)
- ② Crop diversification (eg. introduction of millets)
- ③ Agro-climatic agriculture: non-ecologically viable crops should not be grown.
 (eg) NO sugarcane in acid Haryana region.
- ④ Improving technology of old sugar mills to reduce pollution.
- ⑤ Soil Health check up: and apt fertilizer application.
- ⑥ Micro-irrigation for sugarcane: (eg. Drip irrigation) (PM KSY - micro-irrigation)

Diversification and ecologically sensitive cropping should be followed to counter food insecurity challenges due to climate change, etc

Q.19) Why is it essential to focus on health in the context of urban planning and reforms? How can this be achieved? (15 marks, 250 words)

शहरी नियोजन और सुधारों के संदर्भ में स्वास्थ्य पर ध्यान देना क्यों आवश्यक है? इसे कैसे प्राप्त किया जा सकता है? (15 अंक, 250 शब्द)

Health is a state subject and urban planning comes under state list. Their integration is essential to overcome the limitations of present governance model.

Focus on health in urban planning:

- ① Increase in urbanisation: expected to reach 40% in 2030.
- ② Productivity and healthy workforce essential for urban productivity.
- ③ Density of population is high: need for one health approach to counter communicable diseases.
- ④ Accessibility of health centre is traffic affected transportation: Thus, local health centre of Chandigarh has a hospital in every sector.
- ⑤ Right to Health (DPSP - Article 47)

Focus on health for ^{urban} reforms:

- ① High out-of-pocket expenditure: 45%.
- ② Increase of urban poverty and diseases
 (e.g. COVID impact more in urban areas.)
- ③ Citizen-centric reforms: Health a central theme. for good governance.

Right to Health has been part of DPS P, Art-47 for improvement of public health state is directed. Urban Planning should integrate "one health" approach to deal with current and future health crisis.

Q.20) Analyze the socio-cultural factors contributing to the high attrition rate among women in STEM (Science, Technology, Engineering, and Mathematics) careers in India. Suggest measures to improve their retention in STEM. (15 marks, 250 words)

भारत में STEM (विज्ञान, प्रौद्योगिकी, इंजीनियरिंग और गणित) करियर में महिलाओं के बीच उच्च त्याग दर (एट्रिशन रेट) में योगदान देने वाले सामाजिक-सांस्कृतिक कारकों का विश्लेषण करें। STEM में उनके अवधारण (रिटेंशन) को बेहतर बनाने के उपाय सुझाएँ। (15 अंक, 250 शब्द)

According to Economic Survey, 43% of STEM graduates are women and only 16% STEM employees are women.

Above data highlights apathy of women in STEM jobs.

Various socio-cultural factors contributing high attrition rate in STEM careers in India

- ① Stereotypes: Science based jobs are meant for men and humanities for women.
- ② Motherhood penalty: pregnancy often leads to break in professional life making them lag in their career progression.
- ③ Time poverty: STEM jobs requiring high "Double work": energy and time, women

are forced to do home + job work.

(4) Safety at workplace: STEM jobs dominated by males makes women feel uncomfortable and lack of companionship.

(5) Lack of family support: married or unmarried families fails to show un-conditional support and social-roles takes precedence over career growth.

(6) High workload and lack of empathetic work environment: women sensitive work cultures often lagging in STEM jobs.

Measures to improve retention in STEM:

(a) Inclusive institutions: for example crèche facilities, women toilets, etc.

(b) Post implementation: through training and Internal Complaints Committee.

(c) Social change through: publicity of women contributions in STEM e.g. Kalpana Chawla, etc.

d) Encouragement in schools through: science exhibitions, vocational training, etc like China's women workforce trained in ITTs.

e) Nudging private/corporate sectors to improve gender ratio: @ Adobe's 50% female recruitment policy.

f) Overall safety and security of women is state's responsibility.

g) Breaking stereotypes, breaking glass ceiling by motivating oneself to bring about change. @ Kiran Bedi = 1st women IPS of India.

As Swami Vivekananda said, "A nation cannot progress with women like a bird can't fly on single wing". Inclusive, participative, safe and encouraging work environment are needed in STEM jobs.
